

MT. DOUGLAS MATH DEPARTMENT CALCULATOR POLICY

If a calculator is allowed during tests and examinations in a course offered within Mt. Douglas' Math Department, then the calculator used must be a Sharp calculator with a model number starting with "EL-510R." Various examples are pictured below. Incidentally, this same calculator model-series is the only acceptable option for students within the University of Victoria's Mathematics and Statistics Department.

Calculators may be purchased at the school (or via the School Cash Online Program on the Mt. Douglas website) for \$15 (tax included). In the case of financial hardship, provisions will be in place to help to provide those students with a calculator. Please chat with your teacher or contact one of our administrators for more details with respect to these provisions.
